PROGRAM OF STUDY

- **Ombre Powder Brows & Hybrid Course Description:**

Ombre Powder Brows is a form of permanent cosmetic brow technique that does not mimic hairlike strokes of natural brow hair. This form of technique requires complete shading of the eyebrow, with the head of the brow being the lightest and gradually darker towards the tail of the brow. Hybrid technique is the combination of hair strokes in the front of the brow and ombre towards the tail of the brow. Students learn everything from theory, techniques, brow mapping, marketing, and more to create this brow for clients in the most sanitary environment.

Day 1- Students will receive materials to begin learning theory and practicing in class on latex skin with instructor's guidance. Students must also practice at home after class to ensure students are prepared for hands-on training on the second day. Students will also watch the instructor's pre-recorded video of a LIVE model from start to finish. This video will help students to understand the procedure on a step by step basis to better prepare students for hands on Live model day. Practice with high quality 4k videos.

Day 2- Live model day. Practice makes improvements and working on models is the initial step into this profound profession. Students apply everything learned during the previous day and work alongside the instructor on a model.
